

**Prior Authorization Process for Certain Durable Medical Equipment, Prosthetics,
Orthotics, and Supplies (DMEPOS) Items
Frequently Asked Questions**

1. Q. What is prior authorization?

A: Prior authorization is a process through which a request for provisional affirmation of coverage is submitted for review before a DMEPOS item is furnished to a beneficiary and before a claim is submitted for payment. Prior authorization helps ensure that applicable coverage, payment, and coding rules are met before items are delivered.

2. Q. How does prior authorization help patients with Medicare?

A: Patients with Medicare are able to receive the items and services they need quickly and efficiently. They also appreciate the reduced stress of knowing that the appropriate items should be covered by Medicare.

3. Q. How does prior authorization help Medicare suppliers, physicians, and other practitioners?

A: Suppliers, physicians, and other Medicare practitioners can be confident that the items and services that their patients need will be covered and paid for without time delays, subsequent paperwork, or the need to file an appeal for a claim that was later deemed not payable. In addition, paid claims for which there is an associated affirmed prior authorization decision will be afforded some protection from future audits.

4. Q. What items will be subject to review under the Prior Authorization Process for Certain DMEPOS Items?

A: CMS is narrowly implementing the Prior Authorization for Certain DMEPOS items. The first two items requiring prior authorization will be:

K0856: Power wheelchair, group 3 std., single power option, sling/solid seat/back, patient weight capacity up to and including 300 pounds, and

K0861: Power wheelchair, group 3 std., multiple power option, sling/solid seat/back, patient weight capacity up to and including 300 pounds.

5. Q: When will this prior authorization process begin?

A: The program will begin on March 20, 2017, in Illinois, Missouri, New York, and West Virginia. The Durable Medical Equipment (DME) Medicare Administrative Contractors (MACs) began accepting prior authorization requests (PARs) on March 6, 2017 for dates of service of March 20, 2017 and beyond.

6. Q: When will this program be expanded nationwide?

A: CMS intends to expand the prior authorization process for these two HCPCS codes nationwide in July 2017.

7. Q: Does the prior authorization process for K0856 and K0861 create new documentation requirements?

A: The prior authorization process developed for K0856 and K0861 does not create new documentation requirements. The process simply requires that all documentation regularly required to be maintained be submitted earlier in the course of claims payment.

8. Q: Will accessories to the two power wheelchair codes be subject to prior authorization?

A: Accessories for these two power wheelchair codes are not currently subject to prior authorization.

9. Q: What are the review timelines for a prior authorization request for K0856 and K0861?

A: The DME MACs will complete their review of an initial PAR and send a detailed decision letter postmarked or faxed by the 10th business day following the DME MAC's receipt of the PAR. For PARs that are resubmitted after the initial PAR was non-affirmed (i.e., resubmissions that correct curable errors or add previously missing documentation), the DME MAC will complete their review and send a detailed decision letter postmarked or faxed by the 20th business day of receipt of the PAR.

10. Q: What if a beneficiary needs the DMEPOS item sooner than the review timelines for K0856 and K0861?

A: If delays in receipt of a prior authorization decision could jeopardize the life or health of the beneficiary, then the requester should request that the DME MAC process the PAR under an "expedited" timeframe. For expedited reviews, CMS or its review contractors would expect the submitted documentation to include evidence that applying the standard timeframe for making a decision could seriously jeopardize the life or health of the beneficiary. If it is determined that a request requires expedited review and response, then under this prior authorization process, the DME MAC will make reasonable efforts to communicate a decision within 2 business days of receipt of the PAR.

11. Q: What should be included in the PAR?

A: The PAR must include evidence that the item complies with all applicable Medicare coverage, coding, and payment rules. Consistent with § 414.234(d), such evidence must include the order, relevant information from the beneficiary's medical record, and relevant supplier-produced documentation. The PAR must include necessary documentation from the medical record to support the medical necessity of the DMEPOS

item(s) and any other relevant documents as deemed necessary by the DME MAC. This information can be found through your local DME MAC website in the relevant local coverage determinations, national coverage determinations, and the in the Operational Guide. It is important to note that the relevant documentation from the medical record only pertains to documentation that occurs prior to the delivery of the DMEPOS item(s).

12. Q: What are the different decisions that a PAR can obtain and how will this decision be communicated?

A: The DME MACs can either render a provisional affirmative or a non-affirmative decision.

A **provisional affirmative decision** is a preliminary finding that a future claim submitted to Medicare for the DMEPOS item likely meets Medicare's coverage, coding, and payment requirements.

A **non-affirmative decision** is a preliminary finding that if a future claim is submitted for the DMEPOS item, it does not meet Medicare's coverage, coding, and payment requirements.

DME MACs will send the requester of the PAR (i.e., the entity who will submit the claim for payment) a letter providing their PA decision (i.e., affirmative or non-affirmative), and if applicable, giving the detailed reasons for the non-affirmation. The DME MAC will also share such information with beneficiaries upon request.

13. Q: How will the DME MACs know my claim has undergone prior authorization?

A: After the DME MAC reviews the PAR, they will render a unique tracking number (UTN). Each UTN is specific to a prior authorization request and provisional affirmation or non-affirmation decision. Requesters must ensure they place the UTN on the claim to notify the contractor that they adhered to the prior authorization process, as a condition of payment. If a UTN is not included on the claim for payment or is related to a non-affirmation decision, the DME MAC will deny the claim for failing to meet the prior authorization requirements as a condition of payment.

14. Q: Since prior authorization is a condition of payment for certain DMEPOS items identified on the Required Prior Authorization List, what happens if a claim is submitted for payment without any indication that prior authorization occurred?

A: Claims billed without first submitting a PAR and receiving a provisional affirmation decision will be denied payment. Requesters are reminded that claims for payment must include the UTN that was received in response to their PAR, to indicate that a prior authorization decision was made, whether it is a provisional affirmative or non-affirmative decision. If a UTN is not included on the claim for payment or is related to a non-affirmation decision, the DME MAC will deny the claim for failing to meet the prior

authorization requirements as a condition of payment.

15. Q: Does this prior authorization process protect beneficiary access to care?

A: CMS believes this prior authorization program will both help protect the Medicare Trust Funds from improper payments and make sure beneficiaries are not hindered from accessing necessary DMEPOS items when they need them. Prior authorization allows CMS to make sure items frequently subject to unnecessary utilization are furnished in compliance with applicable Medicare coverage, coding, and payment rules before they are furnished, and it allows the beneficiary to be notified if the item would be covered by Medicare and any potential financial implications earlier in the payment process. Access is preserved by having set timeframes for contractors to complete any PAR decisions, and an expedited process in cases where delays jeopardize the life or health of beneficiaries.

16. Q: How does the prior authorization process help dual eligible beneficiaries?

A: Prior authorization of DME process has the potential to improve access to these specific items DME for dual eligible beneficiaries who need them. In many cases, Medicaid may cover DME that Medicare does not, but first requires suppliers to provide evidence that Medicare will not cover it. If a supplier submits a PAR and receives a non-affirmative decision, the supplier can then submit that to the state so that the state is assured it has met its obligation to pursue other coverage before considering Medicaid coverage. For additional information, please see the January 13, 2017 CMCS Informational Bulletin ([here](#)).

17. Q: Is there more information on the prior authorization process available?

A: Yes, information is available on the [DMEPOS Prior Authorization webpage](#). In the 'Downloads' section, there is a public, published Operational Guide that provides additional details on the prior authorization process for the two HCPCS codes, K0856 and K0861. CMS and the DME MACs collaborated to create the published operational guide. Additional information regarding the prior authorization process and review checklists are also available.

18. Q: Why is Medicare implementing prior authorization for these two power wheelchair codes?

A: These two power wheelchair codes have historically been among those subject to overutilization. The two HCPCS codes selected for prior authorization represent national vulnerabilities to the Medicare Trust Funds, and were selected based on factors including, but not limited to, claims data, systems capabilities, and operational impacts (i.e. supplier educational needs, DME MAC workload).

19. Q: How can a supplier receive education for the prior authorization program?

A: Suppliers should contact their DME MAC for education and more information about DMEPOS Prior Authorization. The DME MACs are:

For beneficiaries residing in **Jurisdiction A** (Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island and Vermont):
